Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

Claims 1-16, drawn to the products such as a packaging system for Group I. absorbent products, classified in Class 206, subclass 440, 459.5 and others.

Claims 17-20, drawn to a method of communicating an absorbent product Group II. feature to a consumer, classified in Class 53, subclass unknown.

The inventions are distinct, each from the other because of the following reasons:

Inventions [II] and [I] are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (M.P.E.P. § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as by providing a first absorbent product as a first consumer message label without the requirement of attaching the first absorbent product to the first consumer message label.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because by their different classification and because they are capable of separate manufacture, use and sale, restriction for examination purposes as indicated is proper.

Art Unit: 3728

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Luan K. Bui whose telephone number is (571) 272-4552.
